PROFILE

I'm currently studying Computer Science at Air University, Islamabad, where I'm learning full-stack development. As part of my journey, I'm working on my Final Year Project, focusing on developing a platform for buying and selling old books. My goal is to become highly proficient in building websites and apps, mastering both front-end and back-end development. I'm passionate about working on interesting projects, constantly learning, and striving to become an expert in the field.

WORK EXPERIENCE

- FYP Project AIR UNIVERSITY ISLAMABAD** 2024 - ONWARD
Web Application for old books sale and purchase
Currently developing a web application for buying and selling used books. The project includes features such as user authentication, book listings, search functionality, and secure payment processing. Utilizing React for the frontend and Node.js for the backend to ensure a seamless user experience. Focused on creating an intuitive and user-friendly interface to facilitate efficient transactions.
- remote work** 2023 - onward
photo and video Quality Controller
- basic project**
